Westwood

And all other leading manufactures.

Over 18,000 different manufacturers part numbers cross referenced!

The Xtra Duty V-Belt
The No.1 belt for grass cutting equipment

- Superior resistance to grit, temperature, oil and weather elements.
- Made with strong cotton cover for long lasting use
- Provides 15% power increase compared to previous belt versions
- Minimum belt tolerances reduce drive vibrations and allow its use in single or multiple drive transmissions without any restrictions.
- Meets requirements for static conductivity

The XDV2 belt is used on mowing equipment providing an increase in power by 15%
