**Solutions for the
Agriculture & Forestry Industry**

Replacement Parts Without the Cost

Buy online
www.acorn-ind.co.uk

Sudden downtime costs far more than replacement parts. It means lost revenue, unplanned spend, and valuable time waiting for deliveries. That's why having a local branch with stock on hand, including compatible alternatives to OEM components, is vital to keeping machinery moving and operations running.

Single Row Tapered Roller Bearing

- Designed to accommodate combined loads.
- Single & double row variations available.

Agri Hubs for Tillage

- Durable and cost effective option for better performance.
- Fast and easy installation across a range of tillage machinery.

Agri Hubs for Seeding

- Flexible designs, compatible with discs and wheels that require external and internal mounting.

Poly-V Belts

- Highly efficient power transmission in compact, high-speed, and high-load agricultural machinery.
- Increased flexibility reduces downtime and energy usage.

Double Row Angular Contact Ball Bearings

- Ideal for machinery with limited space, where two single row angular contact ball bearings arranged back-to-back take up too much space.

Timing Belts

- High-torque, non-slip, and precise power transmission.
- Minimal maintenance required, with high resistance to oil, grease, and abrasion.

Seeding

Range of Brands to Suit Your Needs

Buy online
www.acorn-ind.co.uk

Choose from more than 50 trusted brands of engineering components, we can support a wide range of requirements and budgets. Our nationwide branch network makes it easy to source the right parts quickly, wherever you're operating.

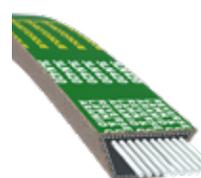

Rod Ends

- Manage heavy, oscillating loads and angular misalignment.
- Resists dirt, moisture and high vibration for durability.

Deep Groove Ball Bearings

- Ideal for machinery with limited space, where two single row angular contact ball bearings arranged back-to-back take up too much space.

V-Belts

- V-belts designed for mowing, kevlar cords provide high-tensile strength and fibre-impregnated rubber prevents cracking for longevity.

HRC Couplings

- Accommodates angular & parallel misalignment, absorbs shocks & vibrations.
- Requires minimal maintenance.

Mounted Bearing Units

- Versatile range of housings and inserts, suitable for a range of machinery.
- Specialised seals available for additional protection from contamination.

Spherical Roller Bearings

- Ideal for machinery with limited space, where two single row angular contact ball bearings arranged back-to-back take up too much space.

Seals for Agriculture Machinery

- Specialist seals to help prevent the ingress of mud and debris, helping bearings to last longer.
- Suitable for a range of machinery.

Roller Chains

- Wide range of roller chains available to suit specific applications.
- Corrosion resistant chains available to keep machinery running longer and prevent excessive downtime.
